

**Re: Electrical System Rebuild for Residents on Meadow Wood Road, Country Club Crescent, Meadow Wood Lane and Watersedge Road.**

May 17, 2016

**Dear Resident:**

Please be advised that Enersource Hydro Mississauga will be making important investments in the electrical infrastructure that supplies power to your neighbourhood.

A rebuild of the electrical distribution system is scheduled to begin in June 2016 and will last approximately four months. Work will include the replacement and relocation of the following: old, decaying poles with new and taller wood poles, powerlines, transformers and associated hardware. To meet current Electrical Safety Authority and Canadian Standards Association requirements, it may be necessary to add new poles and associated hardware to locations where none currently exist.

Trimming will be required on trees that are near our electrical equipment. Trees will be pruned to ensure that a minimum three-year growth clearance and safe distance is maintained from the main powerlines. Dead, defective and structurally weak branches may also require removal.

It is our intention to carry out this work with as little inconvenience to you as possible. However, during this period of construction, there may be some road access limitations while crews are working. Occasional power interruptions will also be required as crews transfer powerlines. Notification of any planned power interruptions will be delivered to you in advance.

For more information, and to view the project plans that illustrate where work will occur, please join us at our open house, as follows:

**Tuesday, May 31, 2016  
Bradley Museum – Log Cabin  
1620 Orr Road, Mississauga  
6:30 p.m. - 8:00 p.m.  
(Drop-in any time)**

If you have any questions before or during the course of this job, please contact Chris McKay, Distribution Design Technologist K-Tek at 905-640-8218.

Sincerely,

A handwritten signature in blue ink, appearing to read "Laura Blondeau".
