

## NEWS RELEASE

### SAVING ENERGY IS AS EASY AS TURNING OFF A LIGHT SWITCH

October 19, 2016 – (MISSISSAUGA, ON) – Taking control over your energy consumption is one of the best ways to manage electricity bills. A simple flick of the light switch can make a significant difference in your electricity usage.

We compiled the following suggestions to help you reduce lighting-related energy consumption:

- Turn off lights in unoccupied rooms.
- Replace incandescent bulbs with efficient ENERGY STAR® compact fluorescent lights (CFLs) - they use about 75% less electricity and last about eight times longer than a regular light bulb.
- Use lower-wattage bulbs for room lighting, or try one stronger bulb instead of two or three weaker ones. Two 60-watt bulbs provide the same light as one 100-watt bulb.
- Use natural daylight to illuminate your space.
