

NOTIFICATION OF PENDING DEMOLITION AND REMOVAL OF NON-RESIDENTIAL SERVICE

CUSTOMER INFORMATION

Service Address: _____

Owner of Property Name: _____

Telephone: _____

Email: _____

Meter Number: _____

Request Date: _____

Account Number: _____

Vacancy / removal date: _____

Customers undertaking a project that requires demolition and removal of service must notify Alectra Utilities well in advance of the anticipated time of demolition. Please note that due to the complex nature of the varied servicing equipment involved, a quick turn-around may not be possible. Therefore, customers are strongly advised to plan their work and know their responsibilities and requirements well in advance of their project.

All non-residential customers requiring service disconnection for demolition purposes must contact 905-283-4144 for details and requirements regarding the disconnection in question.

The customer shall incur the cost to have Alectra Utilities remove existing service lines on the property. Alectra Utilities will charge applicable costs to the customer for services performed relating to the facility and the distribution system, as a result of the customer's request. The removal and restoration of Alectra Utilities equipment that is directly attributed to the isolation or disconnection of the facility for decommissioning purposes is 100% chargeable.

Should the specific isolation request involve an extensive amount of removal work, the basic metered service(s) within the facility's electrical room will remain alive and energized until the entire removal process is completed.

The above requirements are per Alectra Utilities standards, regulations and Conditions of Service (Schedule D).

Owner Signature: _____

Owner's signature confirms having read and accepted the above terms.
