

NOTIFICATION OF PENDING DEMOLITION, RENOVATION AND REMOVAL OF RESIDENTIAL SERVICE

CUSTOMER INFORMATION

Service Address: _____

Owner of Property Name: _____

Telephone: _____

Email: _____

Meter Number: _____

Request Date: _____

Account Number: _____

Earliest removal date: _____

Customers undertaking a project that requires demolition must notify Alectra Utilities at least five business days prior to commencing work, in order to ensure that the electricity service has been de-energized. In addition, it is the responsibility of the customer to confirm with Alectra Utilities that the service has been removed prior to the demolition.

Construction projects for new and formerly existing houses with exterior renovations must submit architectural drawings to our technical staff for review a minimum of fifteen business days prior to commencing work. In the event that an overhead service to a property is disconnected due to demolition, infill or a major renovation, defined as a “change in footprint or addition of a level,” as outlined in Alectra’s Conditions of Service s. 3.1.1.7, Alectra Utilities will require conversion from overhead to underground service. The customer is responsible for costs associated with installing underground service and ensuring the work is performed by an Alectra Utilities-approved contractor. Once underground service has been completed, the customer must submit the contractor invoice to Alectra Utilities in order to be eligible to receive a credit equivalent to up to 30 meters of overhead service.

Prior to any work associated with the above-mentioned construction, the customer must contact Alectra Utilities to discuss the requirements. The appropriate Alectra Utilities design technician may be reached at 905-283-4268.

Owner Signature: _____
Owner’s signature confirms having read and accepted the above terms.
